W13-P1: Do T31 conditional rendering by check isLoading, isError, or fetch user data correctly

The screenshot shows a Visual Studio Code editor with a file named `T31_multiple-returns.js`. The code defines a component `T31_74_MultipleReturns` with the following state and logic:

```
import React, { useState, useEffect } from 'react';
const url = 'https://api.github.com/users/QuincyLarson';

const T31_74_MultipleReturns = () => {
  const [isLoading, setIsLoading] = useState(true);
  const [isError, setIsError] = useState(false);
  const [user, setUser] = useState(null);

  useEffect(() => {
    const fetchUser = async () => {
      try { ... }
      catch(error) {
        console.log(error);
      }
      //fetchUser();
    }, []);

    if (isLoading) {
      return <h2>Loading...</h2>
    }

    if (isError) {
      return <h2>There was error ...</h2>
    }

    const {name} = user;

    return (
      <>
        <h2>{name}</h2>
      </>
    );
  });
};

export default T31_74_MultipleReturns;
```

The browser window shows the application running at `localhost:3000`. The page title is "Tutorial T31_74" and the content is "Loading...". The DevTools component inspector shows the state of the component:

```
hooks
1 State: true
2 State: false
3 State: null
4 Effect: f () {}
```

The screenshot shows the same Visual Studio Code editor with the completed code for `T31_74_MultipleReturns`:

```
const data = await resp.json();
console.log('user data', data);
setIsLoading(false);
setIsError(false);
setUser(data);

} catch(error) {
  console.log(error);
}

}

fetchUser();
}, []);

if (isLoading) {
  return <h2>Loading...</h2>
}

if (isError) {
  return <h2>There was error ...</h2>
}

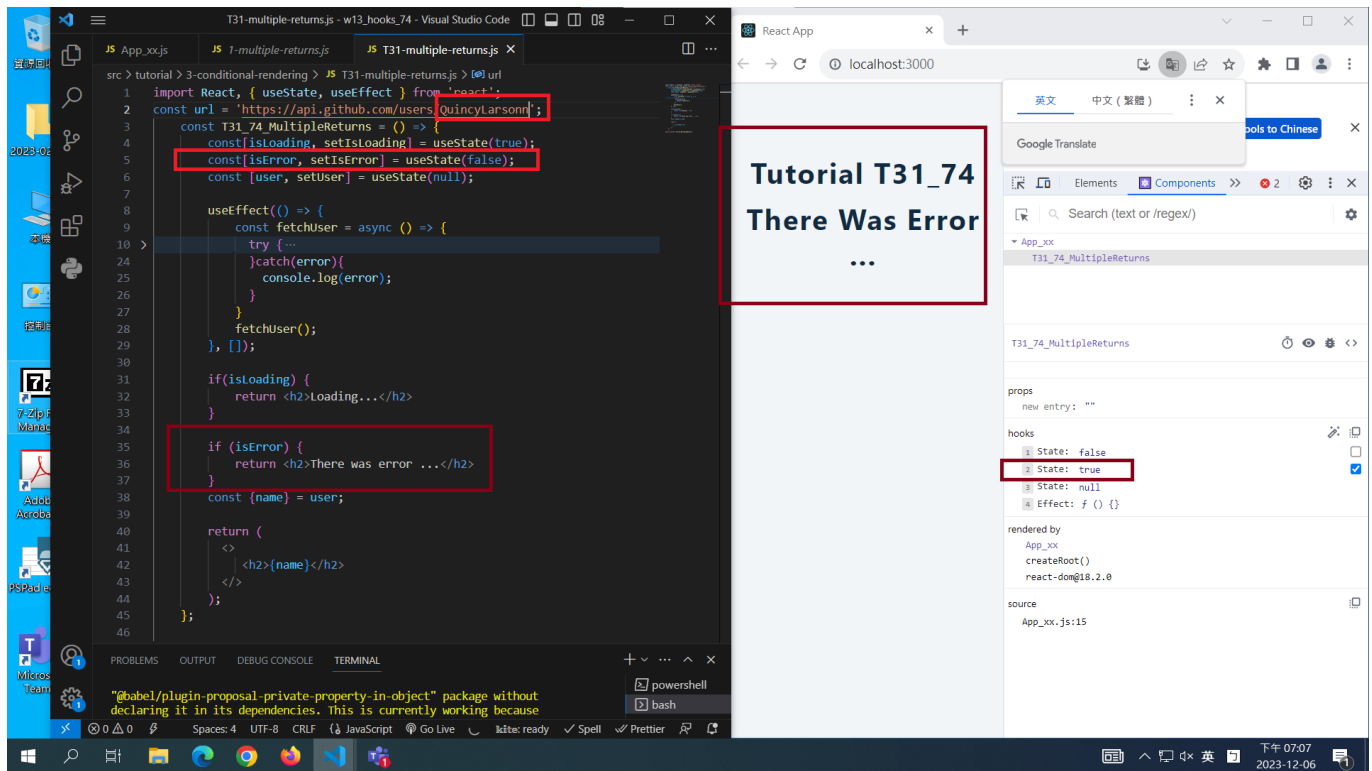

const {name} = user;

return (
  <>
    <h2>{name}</h2>
  </>
);
};

export default T31_74_MultipleReturns;
```

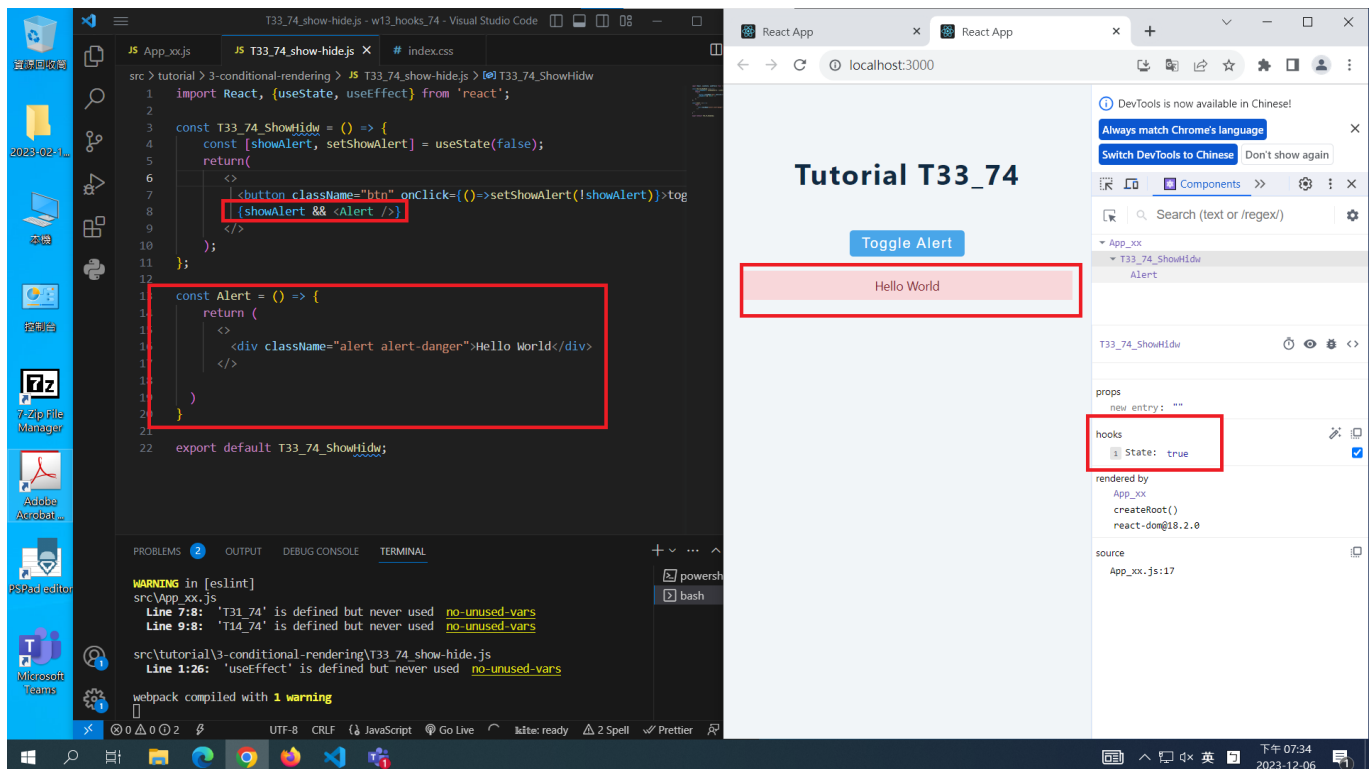

The browser window shows the application running at `localhost:3000`. The page title is "Tutorial T31_74" and the content is "Quincy Larson". The DevTools component inspector shows the state of the component:

```
State: {
  avatar_url: "https://avatars.githubusercontent.com/u/98519",
  login: "QuincyLarson",
  id: 98519,
  node_id: "MDQ6VXNlcjpk4NTE5Mw==",
  avatar_url: "https://avatars.githubusercontent.com/u/98519",
  gravatar_id: "",
  url: "https://api.github.com/users/QuincyLarson",
